Lamiera 2019

LAMIERA is Italy's most qualified international exhibition for metal-forming technology and equipment and in particular for machine tools for sheet metal working and for manufacturing pipes, sections, wire and metal structures, as well as dies, welding, and heat, surface treatment and finishing.

As the fourth consumer market in the world and second in Europe, Italy praises LAMIERA as one of the most qualified international exhibitions related to the metal forming machine tools industry, and to all the technologies developed for the sheet metal working.

Meeting point between offer and demand

LAMIERA is the event of solutions capable of optimising the management of machines and processes, providing systems with dynamic performance and operating flexibility, making production innovation investments safer and more effective.

The solutions offered by LAMIERA can be applied to all industrial sectors: from the automotive to the metalworking machines and equipment manufacturing sector, from electrotechnics-electronics to pharmaceuticals, from cosmetics to medicals, from the food sector to the packaging sector, from chemicals to plastic materials, from optics to the manufacturing of interior design components, from transports to telecommunications, to sensors.

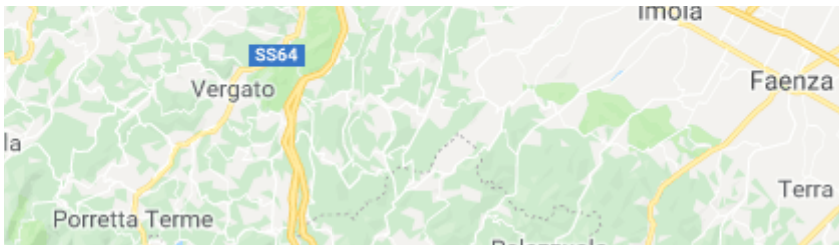

The offer in the spotlight

Among the most represented products: sheet metal forming machines, welding, cutting, and oxy cutting machines, bar, tube and section working machines, presses, blanking and punching machines, treatment finishing, components, accessories.

The exhibitors, masters of innovation

The manufacturers of the sector are renowned for their ability to develop new solutions that can bring important improvements in the products manufacturing, without cost increases.
